
O-mass diatomic Morse test | 300 K | bias factor 20 | 3 x 2 ns
Blind reconstruction from DISTANCE + HILLS
Hidden Morse reference (revealed)
WT-MetaD + radial entropy correction
Between-seed standard deviation
Relative potential (eV)
O-O distance (Angstrom)
Error in the stated comparison interval
Three-seed mean
Reconstruction error (meV)
O-O distance (Angstrom)
Three independent sampling trajectories
O-O distance (Angstrom)
Time (ns)
Finite-time convergence, 1.05-1.60 Angstrom
seed_196837
seed_492845
seed_782531
Potential RMSE (meV)
Accumulated time (ns)
